

**THE OHIO STATE UNIVERSITY**  
COLLEGE OF ENGINEERING

# Cellular Nanotechnology

## CBE 5735

**Credit Hours:**

3.00 - 3.00

---

**Course Levels:**

Undergraduate (1000-5000 level)

Graduate (5000-8000 level)

---

**Course Components:**

Lecture

---

**Course Description:**

Application of nanotechnology to cells for sensing and subcellular manipulation. Synthesis and biological modification of quantum dots and magnetic nanostructures, their unique material properties, and their application.

---

**Prerequisites and Co-requisites:**

Prereq: Sr or Grad standing in Engineering, or permission of instructor.

---

**Course Goals / Objectives:**

- Master basic principles associated with synthetic nanostructures used to study cells
  - Familiarity with applications of nanostructures in cellular manipulation and control
  - Exposure to manufacturing techniques to create synthetic bio-nanostructures
  - Exposure to biological techniques used in research with synthetic bio-nanostructures
-

**Course Topics:**

- Introduction to Nanostructures
  - Synthesis of Nanostructures
  - Nanostructure Toxicity and Modifications for Biological Use
  - Nanostructures for Sensing
  - Nanostructures to Modify Cell Adhesion and Migration
  - Nanostructure Cellular Entry
  - Intracellular Transport of Nanostructures
  - Nanostructures for Controlled Delivery
  - Nanostructures for Cancer Treatment
  - Nanostructure to Manipulate Proteins
- 

**Designation:**

Elective
