Undergraduate Research

MATSCEN 4999

Credit Hours:
0.50 - 3.00

Course Levels:
Undergraduate (1000-5000 level)

Course Components:
Independent Study

Course Description:
Supervised undergraduate research on topics in Materials Science & Engineering.

Prerequisites and Co-requisites:
Prereq: Permission of instructor.

Course Goals / Objectives:
- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as to analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs.

Course Topics:
- Supervised undergraduate research on various topics

Designation:
Elective
