

**THE OHIO STATE UNIVERSITY**  
COLLEGE OF ENGINEERING

# Physical Principles in Welding Processes I

## WELDENG 7001

**Credit Hours:**

3.00 - 3.00

---

**Course Levels:**

Graduate (5000-8000 level)

---

**Course Components:**

Lecture

---

**Course Description:**

Study of the application of physical principles in engineering of arc welding processes and equipment.

---

**Prerequisites and Co-requisites:**

Prereq: Grad standing, or permission of instructor.

---

**Course Goals / Objectives:**

- Understand how the physical laws affect the observed phenomenon in welding processes
  - Through an understanding of the physical laws and the observed welding phenomenon, be in a better position to predict the effects of welding variable changes on welding process behavior
  - Understand the design of electrical power supplies and systems for arc welding
  - Predict joint fill rates and nugget areas for typical arc welding processes
  - Design experiments and analyze results to develop welding process procedure specifications
- 

**Course Topics:**

- Electrical energy sources, power distribution
  - Arc electrical circuit characteristics
  - Arc heat generation
  - Electrical welding power supply designs
  - GTAW, PAW, GMAW, FCAW, SAW
- 

**Designation:**

Elective
