

**THE OHIO STATE UNIVERSITY**  
COLLEGE OF ENGINEERING

# Physical Principles of Welding Processes II

## WELDENG 7002

**Credit Hours:**

3.00 - 3.00

---

**Course Levels:**

Graduate (5000-8000 level)

---

**Course Components:**

Lecture

---

**Course Description:**

Study of the application of physical principles in engineering of non-arc welding processes and equipment.

---

**Prerequisites and Co-requisites:**

Prereq: 7001 or 4001, and Grad standing; or permission of instructor.

---

**Course Goals / Objectives:**

- Understanding of major Resistance Welding processes, weld parameters, equipment, and applications
  - Understanding of the fundamentals and theory of Resistance Welding
  - Understanding of the fundamentals and theory of Solid-State Welding
  - Ability to describe and understand the major Solid-State Welding processes, weld parameters, equipment, and industrial applications
  - Understanding of the fundamentals and theory of High Energy Density welding processes
  - Ability to describe and understand Laser and Electron Beam welding processes, weld parameters, equipment, and industrial applications
- 

**Course Topics:**

- Fundamentals of Resistance Welding processes
  - Equipment, parameters, and applications for Resistance Welding processes
  - Fundamentals of Solid-State Welding processes
  - Equipment, parameters, and application of Solid-State Welding processes
  - Fundamentals of Laser and Electron Beam Welding processes
  - Equipment, parameters, and application of Laser and Electron Beam Welding processes.
-

**Designation:**

Elective
