

THE OHIO STATE UNIVERSITY
COLLEGE OF ENGINEERING

Solid-State Welding/Joining

WELDENG 7021

Credit Hours:

3.00 - 3.00

Course Levels:

Graduate (5000-8000 level)

Course Components:

Lecture

Course Description:

The welding and joining of materials in the solid state with emphasis on physical processes and metallurgical principles.

Prerequisites and Co-requisites:

Prereq: 7001, 7002, 7101, 7102, 4001, 4002, 4101, or 4102, and Grad standing; or permission of instructor.

Course Goals / Objectives:

- Understanding of solid state welding process through exploration of processes and scientific and engineering principles that govern the processes
 - Understand how the physical laws affect the observed phenomenon in solid state welding processes
 - Understand material compatibility and phenomenon that affect compatibility
-

Course Topics:

- Mechanisms of Solid State Welding I
 - Thermo-mechanical Processing of Metals and Alloys (Low to High Strain Rates)
 - Cold and Pressure Welding
 - Roll Bonding
 - Flash Butt Welding
 - Friction Welding
 - Friction Stir Welding
 - Ultrasonic Welding
 - Explosive (Impact) Welding
 - Magnetic Pulse (Impact) Welding
 - Deformation / Resistance Welding
 - Material Changes during Solid-State Joining and Its Impact
 - Diffusion Based Joining Processes (includes transient liquid phase bonding)
 - Meso-, Micro- and Nano-Scale Welding
 - Computational Tools for Solid-State Joining
-

Designation:

Elective
